GCP Google Cloud first · Cloud & AI

Cloud foundations built to stand for decades.

We design, build and run cloud platforms with passion — cost effective by design and compliant with the regulations your business answers to.

Delivered by architect-level certified cloud professionals

- Google Cloud — Architect certified
- Microsoft Azure — Architect certified
- Multi-cloud — Hybrid expertise

About KM Global Tech

A cloud and AI company that treats your platform as its own.

Based in Dwarka, Delhi, we work with enterprises, MSPs and growing businesses across India, the US, Singapore and Dubai — leading with Google Cloud and bringing the same discipline to Azure and hybrid.

Passion
Hands-on architects who own the outcome.

Cost effective
Right-sized designs, budget controls and automation.

Compliance ready
Guardrails and audit trails aligned to your regulations.

How we work

Flexible engagement
Project-based, retainer or on-demand architect hours, aligned to your time zone.

White-label ready
Delivered under your brand for MSPs and partners, with full confidentiality.

Google Cloud first
We start with GCP and extend to Azure and hybrid where it serves you.

What we deliver

From first project to production scale

Landing zone
Secure, governed GCP foundation — org, IAM, networking, logging and guardrails as Terraform.

Greenfield environments
New environments designed right the first time — production and audit ready.

Migration & modernization
Workloads, projects and billing accounts moved with minimal disruption.

DevOps & automation
Terraform, CI/CD and keyless deploys with Workload Identity Federation.

Hybrid identity & networking
Entra ID, conditional access, hybrid connectivity and NGFW designs.

Governance & FinOps
Cost visibility, budget controls and automated governance.

Our framework

Cloud Pillars + 1

Security & compliance
Identity, encryption and policy guardrails.

Reliability
High availability, backup and disaster recovery.

Cost optimization
Budgets, alerts and idle auto-shutdown.

Performance
Right-sizing and autoscaling.

Operational excellence
IaC, CI/CD and monitoring.

+1 AI & data
Data foundations and governed Google Cloud AI.

Let's build your cloud foundation.

Share where you are today — we'll return a clear plan and transparent estimate.
